

- ▶ **Do you need to email documents as color, text-searchable PDF attachments with password protection?**
- ▶ **Are your customers asking you to send documents electronically?**
- ▶ **Would you like to reduce your mailing costs?**
- ▶ **Would you like to email documents to your customers directly from your iSeries (AS/400) machine? (e.g., Purchase Orders, Invoices, Statements, Expense Reports, etc.)**

Now you can... with EZeMail/400 solution! EZeMail/400 enables you to email any iSeries (AS/400) form or document... directly from your iSeries (AS/400) machine!

EZeMail/400 also enables you to edit, send, receive, display, print and track your email on any iSeries (AS/400) terminal or connected PC... through any mail server... over any network. *Reaching out has never been so EZ!*

**EXAMPLE:** Several of your customers have requested that you email all monthly invoices to them.

## Benefits of Sending eMail Versus Mail:

- Secure electronic file format... compress and password protect.
- Reduce mailing costs... no postage, envelopes, or mailing labels required.
- Reduce labor costs... much faster to email than print, stuff & stamp.
- Meet customer needs... many companies prefer to receive documents electronically.

## EZeMail/400 Solution Interfacing:

- When interfaced with ACOM's EZeDocs/400 eForms Solution, EZeMail/400 can convert all your EZeDocs/400 electronic forms into PDF documents, and you can email these important documents to your customers or partners! (EZeDocs/400 eForms allows you to print all forms to a laser printer, using blank paper, or to distribute multiple copies to multiple printers, all from your iSeries or AS/400 machine - see ACOM's EZeDocs/400 eForms Solution datasheet for more information.)

## EZeMail/400 Details:

- EZeMail/400 can exchange email through any network mail server available to your iSeries (AS/400) (including Exchange Servers and Notes/Domino Servers), using a standard PC modem.
- The software comes complete with a text editor for creating, editing, and viewing email messages on any iSeries (AS/400) terminal. It has a spell checker for 7 different languages. It also contains a phonebook for saving and retrieving email addresses and address lists.
- EZeMail/400 is compliant with SMTP/MIME and POP3, which allows multiple attachments to be sent and received with your messages. Any iSeries (AS/400) objects, including physical files, source files, spool files, and save files, can be prepared as attachments and exchanged with anyone on the Internet. PC-type objects can also be sent and received, through the iSeries (AS/400) Shared Folders.
- Mailboxes for each user or for groups of users may be created by an administrator. Inbound mail is automatically routed to the appropriate mailbox using routing tables. A mailbox titled POSTMASTER is given all mail that cannot be routed properly. The Postmaster can view and route them appropriately.
- Users can copy or route their messages to other mailboxes or to categories they set up within their own mailbox. Messages can be marked as personal (which are completely private) or confidential (which will only allow security administrators to access them).
- EZeMail/400 utilizes the power of the iSeries (AS/400) database to build a set of index cards that instantly sorts itself in a thousand different ways. You can use it to keep track of a wide variety of information, including email addresses.
- It can be used to keep track of company and contact names, phone numbers, sales information, or anything to which you would like to have quick access.

- EZeMail/400 works by entering information on cards, with up to a thousand lines per card, a million cards per file, and an unlimited number of files. EZeMail/400 can store rigidly structured data, or free-form information such as notes and comments, both on the same cards. You can organize any data the way you want it, on the fly, without any programming.

## Leverage your EZeMail/400 with WebView

- View logs of emails sent from ACOM's EZeMail/400 in a flexible, sortable, graphical environment. This browser-based dashboard enables fast and easy access, allowing you to view and manage the email messages that were sent, avoiding the need for green-screen interaction. From the logs, confirm that documents have actually been sent; redirect them in one format, such as email, to the other such as fax; and reroute them along with attachments right from the dashboard. It's intuitive, effortless and has flexibility that just isn't available on the green screen.

## More ACOM Solutions for iSeries (AS/400) Environments:

- EZFax/400 Fax Module
- EZPDF/400 PDF Module
- EZContentManager
- EZeDocs/400 eLabels Module
